Message from the Head Teacher

We have had an exciting Science Week this week. The children have been taking part in lots of experiments, using their knowledge to predict, explore and find out.

Year One visited the Science Museum on Tuesday and journeyed to the International Space Station, led by astronaut Kush!

Genie Lab truly brought science to life on Wednesday with fantastic workshops for all the children.

A special thank you to Mrs Laverock for organising such a brilliant learning week for the children.

Amy Hodges

SCIENCE WEEK

Year 1 visited the Science Museum for an exciting day of scintillating science! Activities included creating designs and looking for patterns in nature in the pattern pod, using our senses to explore in the garden, operating pulleys and building and constructing with giant Lego. Then it was off to 'destination space' to learn how astronauts cope with life inside the International Space Station. This included learning how to clean dirty water and how to go to the toilet safely without gravity! Kush was chosen to become an astronaut and had the job of repairing some damaged tiles on the outside of the Space Station but with help from his friends, he managed to complete the task safely. Well done Kush and all the children for their enthusiasm and eagerness to learn more about our beautiful world.

Super Scientist star of the week

1AH — Joseph Kemp	1VL — Isla Allgrove
1SB — Kush Beri	RJE — Hugo Drew
RAG — Harris Comley	RCM — Haris Poonja
RRLC—Keon Roberts-Hall	RRAH—Max Ponsford

Don't Forget!

- Monday - 9.00am Children will have their individual photographs taken. Please come to school in blazers.
- Wednesday - 8.45am Reception coffee morning. Parents invited to join us.
- Thursday - Nasal flu vaccination for Reception & Year 1
- Friday — Open morning for prospective parents. Friends quiz night at 8.00pm at main site school hall.

Inspiring young minds to create a lifelong passion for learning and discovery.
