11.15am	BREAK				
11.45am	French	Curriculum Enrichment	PSHE	Geography	Curriculum Enrichment
12.30pm	LUNCH				
1.30pm	Form Tutorials <i>Small group tutorials with your tutor – each tutor will timetable small groups of 3-4 pupils to meet once per week via Teams.</i>				
1.45pm	Curriculum Enrichment	Maths	Curriculum Enrichment	Maths	Curriculum Enrichment
2.30pm	BREAK				
2.45pm	Curriculum Enrichment	Curriculum Enrichment	Curriculum Enrichment	French	Thought for the Week
3.30pm	DT	Drama	Games	Music	Art

Taught subjects will be delivered via a combination of Teams and Firefly. This includes English, Maths, Science, French, German/Spanish, Geography, History, RS and PSHE. The sessions will be delivered by the normal class teacher. Lessons will start at the given time and will typically follow this format: a 5-10 input from the teacher either live via Teams or via a pre-recorded video input on Firefly. Pupils will then be set tasks which follow on from the initial input and will work independently for 20-25 minutes. The class teacher will be available via the Chat function on Teams to respond to questions about the work “live”. The lesson will finish with a 15-minute plenary / feedback / discussion session with the teacher. Depending on the subject, there may be some variation to this, at the discretion of the teacher. All sessions will be recorded and saved on the class’s Team.

The creative and practical subjects will be delivering sessions at 3.30pm. Details of these will be shared the day before to allow pupils to have the correct equipment or resources available. These are considered optional and pupils are at liberty to choose the sessions that they are most interested in.

Curriculum Enrichment sessions are designed to allow flexibility in your child’s day and a choice of activity based on need. There are six possible uses of this time:

1. Catching up on incomplete work
2. Catching up on lessons missed by following the recordings
3. Century Tech for English / Maths / Science
4. Quizlet / Language Gym for Languages
5. Cross-curricular STEAM project (which can largely be completed off-line)
6. Coding projects for Computing
